

HoistCam™ Train the Trainer

www.hoistcam.com/trainer

HoistCam by Netarus “Train the Trainer” program is geared toward training facilities to promote and educate students about the benefits of camera systems on heavy equipment such as cranes. If you provide training to operators, your organization may qualify for a highly subsidized HoistCam system to assist training about the safety and productivity gains from camera systems across job sites.

BENEFITS FOR TRAINING FACILITY

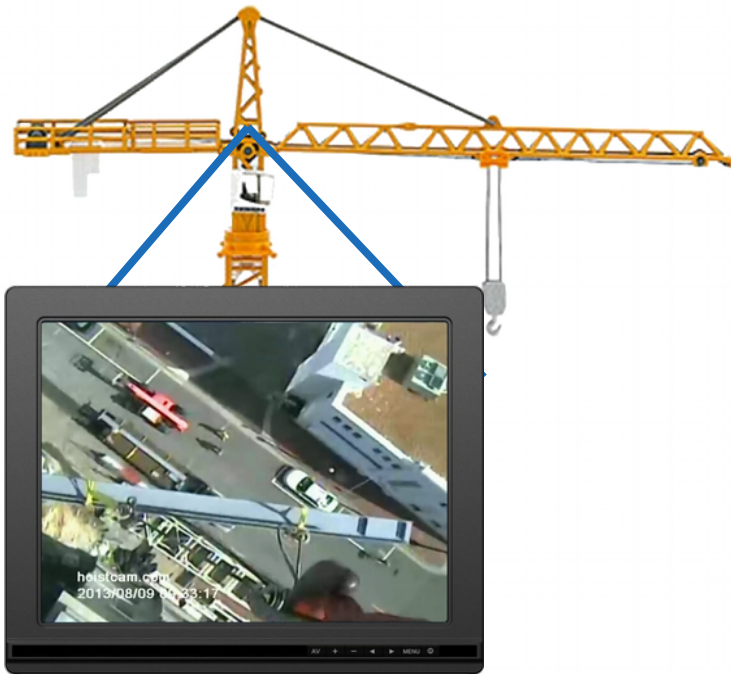

The following are benefits of participating in the HoistCam “Train the Trainer” program:

- One complimentary HoistCam system from Netarus to be used in training based on the program established – MSRP \$5kUSD to \$10kUSD.
- Training facility referral bonus custom to the training facility
- Full ownership of training material and establishment of curriculum for the training program
- Assistance from Netarus with existing training materials to incorporate into existing program including PowerPoint slides.
- Discount on HoistCam systems for student purchases in future

REQUIREMENTS FOR TRAINING FACILITY

The following are the suggested requirements for the HoistCam “Train the Trainer” program:

- Must create their own curriculum and test program – either hands-on and/or written
- Recommend at least 2 hour training session on proper use of camera systems on cranes

9.7in Monitor in Operator's Cab

HoistCam in Ruggedize Transport Case

HOISTCAM OPERATOR SAFETY BENEFITS

- Improve blind and distant lifts
- Verify area clear of obstructions and personnel
- Verify load properly attached to the hook block

HOISTCAM RIGGER SAFETY BENEFITS
